1. BUSINESS DESCRIPTION

1.1 Scope

The document Garment Stock Offer can be used for the electronic transmission of stock data from the Trade organisation or the Garment company into the e-Stockflow service.

1.2 Generalities

The document is issued by the Trade organisation or the Garment company to create an offer of garment stock through the e-Stockflow service.

Each document line must deal with one stock item in one definite location.

The description of the stock item includes the classification per category and sex and the assortment of color/sizes.

1.3. Possible scenario

2. IMPLEMENTATION GUIDE

2.1 General structure of XML document

All the business data that can be exchanged through this class of documents are shown in the following "document structure", that provides a simplified vision of the Schema.

In particular:

- the two numbers following each element define its "cardinality" (minimum and maximum number of occurrencies); the minimum equal zero indicates that the element is optional, the minimum greater than zero indicates that is mandatory;
- the bold character denotes the complex elements (aggregates of simple elements) that were built for the sake of functionality and re-usability of some complex informations sets. The child elements in each parent element are easily spotted as "indented":
- the symbol "@" denotes an attribute of the preceding element; here "the usage indicator (optional, required, ...) is shown in square brackets.
