

TOWEF0 Project Final Workshop Bologna, 27th February 2004

The TOWEF0 (Towards Effluent Zero) project is elaborating and applying a multicriteria integrated approach, aimed to promote the efficient use of water within textile finishing industries, optimising the overall impact on the environment.

The integrated multicriteria methodology coupled with an effective regulatory policy is expected to contribute to the improvement of competitiveness of industries.

The project results will be presented in the final workshop in Bologna, Italy, on the 27th of February 2004.
